

India's No 1 Interactive Kiosk Solution Provider & Manufacturer

Safety Training Kiosk!

Safety is of paramount importance. With new regulations that make it mandatory for factories to conduct safety training, our kiosks will automate a lot of these awareness programs.

BISSET redefines the way employees are taking the online courses by providing a trusted mechanism of managing the details of the candidates as well as the examination.

All the information is secured using cryptographic techniques and stored in a private blockchain which can be accessed only through a key thus ensuring that the data has not been tampered and is immutable. Keep your organization relevant and up to date automatically with our state of the art safety training touch screen kiosks.
